

Service Offerings

GKI Educator Bootcamp

Designed to give a **comprehensive foundation** to the techniques and skillsets necessary to be successful in Expanded Learning environments. (Great for new staff!)

Curriculum covers best practices in **Social-Emotional Learning (SEL)**, Common Core-aligned curriculum design, **Youth Development**, and Positive Behavior Intervention and Supports (PBIS) through **Restorative Frameworks and Practices**.

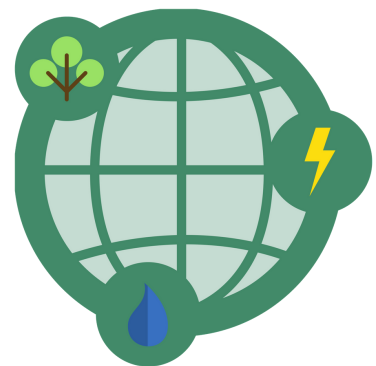

Administered in three 4-hour units, with a recommended 2-hour Executive Leadership breakout session for **site leaders, managers, and program directors**, to receive guidance and coaching around implementing Youth Development principles into program planning and design.

WorldCraft by GKI

(4hr STEAM Activity)

An exciting and interactive real-time resource management game that you can play with your students using nothing more than printouts and string. An excellent way to build 21st Century skills like planning, logic, and environmental awareness!

WorldCraft invites students to transform their classrooms into an engaging and interactive space, where different teams must make decisions about food, power, and waste. Activity comes with facilitator questions to create an experiential and inquiry-based introduction for students to environmental issues.

Conflict Resolution & Restorative Practices

(4hr Workshop)

Learn how to apply the principles of Restorative Practice and Social-Emotional Learning (SEL) to mediate conflicts in ways that encourage youth to identify and implement their own solutions to conflict, and empowers staff to transform their programs into spaces where students feel safe, supported, and ready to learn!

All participants will receive experiential exercises and resources which can be immediately implemented with youth.

Conference Workshops

Great for Keynotes!

How Teachers Will **Save The World!**

The next generation will face some of the greatest challenges in history. Learn how you can use SEL and Restorative Practices to empower your students to become the needed change-makers of tomorrow!

SEL and awareness is foundational to both best practices in classrooms and in professional environments. By giving teachers more tools to raise the awareness and skills of students' emotional impact on each other and their environment, they will be able to raise a future generation that can create widespread positive change.

Mindfulness & Emotional Resilience

Participants learn to become aware and present to their thoughts, feelings, bodily sensations, and the surrounding environment. They learn to compassionately accept the conditions as they are while striving toward their goals without attachment to outcomes.
